Commentary

Credit came under pressure in late September as higher government yields and heavy supply hit spreads (Pareto, 12 Oct). Q3 euro HY issuance was EUR 27.1bn, second-strongest third quarter on record. US big tech is now close to 10% of gross euro non-financial corporate supply (ECB). A PureGym deal priced in line but softened on the break. After hot US CPI and the equity sell-off, expect a cautious tone and wider new issue concessions today (inference, not sourced).

Fixed income data is thin this morning. Treat as incomplete.
