

MORNING BRIEFING — 9 JUNE 2026

LONDON PRE-OPEN

TUESDAY

ECB MEETING THURSDAY

IRAN-ISRAEL CEASEFIRE FRAGILE

Generated: ~07:00 BST, Tuesday 9 June 2026 | Data collected approx. 06:30–07:00 BST

KEY RISKS: Iran-Israel direct exchanges over the weekend; ECB 25bp hike Thursday (91% priced); chip sector recovering from Friday’s 10% rout; US 10Y at 4.57% (2-week high); Brent \$94 after \$98 intraday spike.

2. IMPORTANT NEWS

Iran-Israel ceasefire falters: weekend missile exchanges, fragile pause in place – CNN / Reuters, 7-8 Jun 2026

Iran launched ballistic missiles at Israel on June 7 after Israel struck southern Beirut. Israel retaliated with strikes on Iran. On June 8, Iran declared it had ended military operations; Israel halted attacks. US negotiating a 60-day ceasefire extension (preliminary MOU reached May 28, awaiting Trump approval). First direct Iran-Israel confrontation since the April ceasefire. Brent spiked to \$98/bbl intraday before easing. WHY IT MATTERS: geopolitical risk premium is back; energy prices, shipping routes, and risk sentiment all exposed to any escalation.

US May jobs: +172k (vs 85k consensus) sends S&P -2.6% Friday; partial Monday recovery – CNBC / TheStreet, 5-8 Jun 2026

Unemployment steady at 4.3%. S&P ended nine-week win streak Friday. Monday bounce led by chip stocks (Micron +10%, Marvell +9%); S&P +0.30%, Nasdaq +0.86%. Dow -0.16% as software weighed. WHY IT MATTERS: "higher for longer" rate narrative entrenched; Fed held at 3.5-3.75% in April but market pricing potential hike by Q4 2026; equity multiples face compression.

ECB rate hike 25bp expected Thursday June 11 – 91% market probability – CNBC / ECB calendar, 8 Jun 2026

Would lift deposit facility rate to 2.25%. Euro area CPI at 3% (April) driven by Iran war energy prices. ECB in silent period. WHY IT MATTERS: EUR/USD near weakest since April 3 at 1.1537; forward guidance language post-hike (pause vs. more hikes) will set EUR, Bund, and bank stocks trajectory for weeks.

Nvidia-SK Hynix announce AI memory co-development partnership – Schwab Market Update / CNBC, 8 Jun 2026

Collaboration for "next-generation memory" aligned with Nvidia AI infrastructure roadmap. Follows SK Hynix's role in HBM supply chain. WHY IT MATTERS: reinforces AI infrastructure capex cycle; tailwind for memory names and GPU ecosystem; signals Nvidia's supply chain deepening against competition.

Marvell Technology (MRVL) to join S&P 500 on June 22 – Schwab Market Update, 8 Jun 2026

Announcement drove MRVL +9% Monday after Friday's chip sector collapse. WHY IT MATTERS: passive index fund buying ahead of June 22 effective date provides a technical tailwind; sentiment boost for AI networking sector; illustrates AI theme's index-level penetration.

3. EUROPEAN FUTURES (PRE-OPEN ~07:00 BST)

Data collected approx. 07:00 BST, Tuesday 9 June 2026 – Sources: Barchart, Investing.com, Bloomberg

INDEX	FUTURES LEVEL	EXPECTED MOVE	CONTEXT
Euro Stoxx 50	6,067	-0.2% vs prev. close (6,080)	Opened at 6,095; Iran risk and ECB uncertainty weigh; partial rebound expected if Asia holds
DAX	n/a	-0.68% indicated	Specific level not sourced; YTD -2.0%; energy costs and ECB hike risk pressure German exporters
CAC 40	n/a	n/a	Not sourced this session; energy majors (TotalEnergies) and luxury names key drivers
FTSE 100	n/a	+0.01% indicated	Near-flat open; oil majors (Shell, BP) offset banks and consumer caution; defensives support

US FUTURES – CONTEXT

INDEX	LEVEL	CHANGE	NOTE
S&P 500 futures (ES)	~7,421	+0.21%	Mild positive; holding Monday recovery; chip sector a key variable
Nasdaq 100 futures (NQ)	29,085	+0.25%	Tech bid extends; AI narrative intact; watch chip names at open
Dow Jones futures (YM)	50,776	+0.65%	Energy and defensives leading; near Friday pre-shock levels

4. YESTERDAY'S CLOSES — MONDAY 8 JUNE 2026

Data collected 17:30–18:00 BST, Monday 8 June 2026 — Sources: CNBC, Trading Economics, ETF Trends

INDEX	CLOSE	CHANGE	NOTE
Euro Stoxx 50	6,080	+0.30%	Pared early losses; Iran ceasefire signals provided afternoon relief
STOXX Europe 600	622	flat / +0.0%	Edged above flatline; broad market cautious
DAX	n/a	n/a	Specific close not confirmed; YTD -2.0% as of Jun 8
CAC 40	n/a	n/a	Not sourced
FTSE 100	n/a	n/a	Not sourced; oil price support vs. consumer headwinds

5. US MARKETS — MONDAY 8 JUNE 2026 SESSION

Source: TheStreet, CNBC — data collected approx. 22:00 BST (16:30 ET close)

INDEX	CLOSE	CHANGE	POINTS MOVE
S&P 500	7,405.73	+0.30%	+22.2
Nasdaq Composite	25,929.66	+0.86%	+221.1
Dow Jones Ind. Avg.	50,786.01	-0.16%	-80.77

Session tone: Tentative risk-on recovery. Semiconductors led the Nasdaq bounce; the VanEck Semiconductor ETF (SMH) regained ground after Friday's worst-day-since-April-2025 collapse. Micron (MU) +10% and Marvell (MRVL) +9% were key drivers. Dow underperformed as Salesforce (-1.26%), Disney (-1.13%), and Microsoft (-1.00%) offset Nvidia (+1.88%), Apple (+1.50%), and Chevron (+1.30%).

Leading sectors: Semiconductors, Energy, Select Technology

Lagging sectors: Software, Entertainment, Consumer Discretionary

Key takeaway: Monday's recovery covered roughly half Friday's losses on the Nasdaq. The bounce was technically plausible but sentiment remains fragile. A "higher for longer" rate regime and Iran geopolitics leave markets in a cautious range rather than a new leg higher. The market is essentially in holding pattern ahead of the ECB Thursday and any ceasefire developments.

6. ASIAN MARKETS – OVERNIGHT SESSION (TUESDAY 9 JUNE 2026)

Source: CNBC Asia, Yahoo Finance, Bloomberg – data collected approx. 06:30 BST

INDEX	LEVEL	CHANGE	NOTE
Nikkei 225 (Japan)	64,654	+0.98%	Partial recovery; chip-related names (TDK, Tokyo Electron) and exporters lead; yen stable
Hang Seng (Hong Kong)	n/a	n/a	YTD -3.8% context as of Jun 8; Middle East risk and USD strength limit HK appetite
Shanghai Composite (China)	n/a	n/a	Not sourced this session; China macro and stimulus backdrop key
Kospi (South Korea)	n/a	n/a	Jun 5 close: 8,160.59 (-5.54% that session); South Korea's chip export exposure amplifies US swings

Tone: Cautious recovery in Japan. Nikkei bouncing after a sharp Monday selloff that absorbed Friday's US shock. AI and semiconductor names helped by the Nvidia-SK Hynix news. Middle East tensions and Thursday's ECB meeting cap gains. Kospi remained volatile in prior sessions due to memory/chip exposure; June 9 Kospi data not confirmed at time of writing.

7. COMMODITIES

Source: Fortune / OilPrice.com / EIA / Trading Economics – data collected approx. 07:00 BST, 9 Jun 2026

COMMODITY	LEVEL	CHANGE (1D)	CONTEXT
Brent Crude	\$94.00 / bbl	+~1.0%	Spiked to \$98/bbl intraday Monday on Iran missile exchanges; eased on Iran ceasefire declaration; Hormuz risk premium remains embedded; Brent/WTI spread elevated vs. historical norms
WTI Crude	\$91.32 / bbl	+0.86%	Jun 8 close; jumped >4% intraday on Iran-Israel news; OPEC+ supply backdrop supportive; US shale production uptick a partial offset
Gold (XAU/USD)	\$4,330 / oz	--0.5% est.	Near 2-month low; strong USD (DXY ~100) and hot jobs data weigh on non-yielding gold; safe-haven demand partly offset by rising real yields; precious metals index -1.7% recently
Copper (COMEX)	\$6.64 / lb	n/a	Continuous contract; record high \$6.72/lb set May 13; AI data center buildout drives structural demand; metals index +3.7%; China demand uncertainty tempers near-term
Natural Gas (Henry Hub)	n/a	+6.1% MoM (May)	Global LNG prices elevated on reduced Strait of Hormuz flows; US domestic production 120.2 Bcf/d (+4% YoY Q1 2026); wide spread between US domestic and international LNG prices

8. RATES & FX

Source: FRED / Trading Economics / Federal Reserve H.10 / Trading Economics – data collected approx. 07:00 BST, 9 Jun 2026

INSTRUMENT	LEVEL	CHANGE	CONTEXT
US 10Y Treasury yield	4.57%	+6bp vs Fri	2-week high; 172k May jobs print doubled expectations; higher-for-longer narrative fully reset; Fed held 3.5-3.75% in April; market now debates Q4 hike
German Bund 10Y	n/a	n/a	ECB 25bp hike Thursday (91% priced); Bund yields should push higher post-decision; energy inflation at 3% complicates ECB forward guidance
EUR/USD	1.1537	+0.08%	Near weakest since April 3; Iran energy/inflation headwind offsets ECB hike support; euro steadied just above \$1.15; watch 1.15 as near-term support
GBP/USD	~1.3342	n/a (Jun 9)	Last confirmed Jun 5; broadly range-bound; BoE watching UK energy cost pass-through; GBP resilient vs. EUR on relative inflation dynamics
DXY (USD Index)	100.1	+0.04%	Elevated after +1%+ last week on jobs data; hovering near 100 resistance; breakout above would pressure commodities, EM, and EUR assets; Fed rate expectations key driver

9. DCM — PRIMARY BOND MARKET

YESTERDAY’S ISSUANCES (MONDAY 8 JUNE 2026)

No specific EUR or USD deal data confirmed from searches for June 8. Primary market likely quiet in pre-ECB window. Most investment-grade issuers expected to have front-loaded activity prior to June 11 or are awaiting the post-decision window. Any issuer pricing into Thursday’s meeting would carry event-risk premium on books.

PIPELINE / EXPECTED THIS WEEK

SEGMENT	OUTLOOK	NOTES
EUR IG Corporates	Light / wait-and-see	ECB June 11 hike effectively priced; most issuers pausing; window likely reopens Friday post-decision; US tech hyperscalers continue EUR-denominated issuance for AI capex
SSA / Government	Possible short-dated	EU funding needs elevated (Ukraine-related); EU could issue up to €160bn in 2026; EIB and KfW may access mid-week; defence bond framework in development
EUR High Yield	Closed	Geopolitical risk, rate uncertainty, and oil-driven inflation close the HY window; monitor post-ECB for re-opening signal
USD IG (US context)	Active	US IG market supported; strong issuance YTD; tech sector (hyperscalers) pricing EUR deals for AI infrastructure; record corporate bond issuance pace maintained in 2026
EUR Financials	Selective	European banks cautiously active; ECB hike a tailwind for NIM but adds duration pressure; some senior preferred and covered bond issuance likely post-Thursday

KEY CREDIT SPREADS

INDEX	LEVEL	CHANGE (1D)	DIRECTION
iTraxx Main (5Y EUR IG)	n/a	n/a	Not sourced – verify Bloomberg/Markit
iTraxx Crossover (5Y EUR HY)	n/a	n/a	Not sourced – verify Bloomberg/Markit
CDX IG (5Y USD IG)	n/a	n/a	Not sourced
Avg EUR Corp IG Spread	Tight (YTD trend)	Positive YTD	Tightening bias YTD – Morningstar Eurozone Corp Bond +1.2% YTD; +3.2% past 12m

COMMENTARY

Primary market tone is cautious but not closed. The ECB Thursday meeting creates a natural pause; most IG issuers front-loaded in May when conditions were favorable. Investor appetite for EUR IG remains solid: Morningstar Eurozone Corporate Bond Index +1.2% YTD with strong inflows. Geopolitical energy risk (Iran/Hormuz) adds a layer of uncertainty to spread levels, particularly for energy-sector issuers and transport. Corporate balance sheets are solid. The post-ECB Friday window is expected to attract pent-up supply, particularly from industrials, financials, and defence-adjacent issuers. European defence bond framework (potential €100bn+) could be a structural market catalyst this summer.

10. ECONOMIC CALENDAR – TUESDAY 9 JUNE 2026

Sources: Trading Economics, Econoday, ECB calendar – specific consensus figures not confirmed; verify with your data provider

LONDON TIME	REGION	INDICATOR	CONSENSUS	IMPORTANCE
07:00	Germany	Trade Balance (Apr 2026)	n/a	Medium
07:00	UK	BRC Retail Sales Monitor (May 2026)	n/a	Medium
09:00	Eurozone	ECB silent period – no speakers (pre-meeting Jun 11)	–	High context
10:00	Eurozone	Eurostat release (TBC)	n/a	Medium
14:00	US	NFIB Small Business Optimism Index (May 2026)	n/a	Medium
All day	Geopolitical	Iran-Israel ceasefire monitoring – any strike activity or diplomatic breakthrough	–	High – oil and risk event

Note: Consensus figures for June 9 releases not confirmed. Verify against Trading Economics, Econoday, or your broker’s calendar. ECB meeting Thursday June 11 is the dominant event for the week.

11. CORPORATE EVENTS & EARNINGS – TUESDAY 9 JUNE 2026

Source: EarningsWhispers, Yahoo Finance, MarketScreener – data collected 9 Jun 2026

EVENT	REGION	TYPE	NOTE
22 US earnings releases	US	Earnings	22 companies reporting today; specific names not confirmed – check Yahoo Finance / EarningsWhispers for full list and consensus estimates
4 IPO pricings	US	IPO	Four IPO pricings scheduled; market receptivity being tested given elevated rates and geopolitical uncertainty; watch for pricing relative to range
22 stock splits	US	Corporate Action	22 splits effective today; technical but can drive retail interest and index rebalancing flows
Europe earnings / AGMs	Europe	Mixed	Specific names not sourced – check MarketScreener Europe calendar for June 9 corporate diary
73 economic events (US)	US	Data/Events	73 US economic events alongside earnings today; high-activity day for macro data flow

Note: Full company-level list not sourced. Verify against your earnings calendar. Specific EU corporate names require MarketScreener or Bloomberg.

12. STOCKS TO WATCH – TUESDAY 9 JUNE 2026

COMPANY	TICKER	SECTOR	REASON TO WATCH	DIRECTION
Micron Technology	MU	Semiconductors	Recovering from Friday's -13%; +10% Monday; AI memory demand + Nvidia-SK Hynix partnership tailwind; highest-vol memory name in the AI cycle	Bullish continuation watch
Marvell Technology	MRVL	AI Networking	S&P 500 inclusion June 22 – passive buying expected in coming days; AI custom ASIC leader; +9% Monday	Positive – index inclusion bid
Nvidia	NVDA	AI / Semis	SK Hynix AI memory partnership announced; AI infrastructure demand unabated; +1.88% Monday; bellwether for entire AI sector	Positive – AI capex theme intact
Boeing	BA	Aerospace	Jefferies top pick, \$255 PT; production rates ahead of schedule; commercial aftermarket MRO demand +3.2% CAGR projected 2026-35; geopolitical defense tailwind	Watch for upside catalysts
TotalEnergies	TTE FP	Energy	Brent at \$94; Iran-Hormuz risk premium keeps European energy majors supported; LNG exposure valuable; Shell, BP similarly positioned	Oil-price leveraged upside
IAG (Int'l Airlines Group)	IAG LN	Aviation	Jet fuel at elevated levels with Brent \$94; Middle East route capacity disruptions reduce utilisation; Iran airspace impact on long-haul; airlines face cost squeeze	Negative – fuel and route risk
Hapag-Lloyd / A.P. Maersk	HLAG GY / MAERSK B	Shipping	Hormuz and Red Sea rerouting sustains elevated container freight rates; geopolitical risk premium in rates; supply chain cost inflation beneficiary	Freight rate premium supportive
Rheinmetall	RHM GY	Defense	Iran-Israel escalation and NATO commitments driving European defense budgets; EU defence bond framework a structural re-rating catalyst; L3Harris (\$365 PT) US analog	Geopolitical premium supports
Deutsche Bank / BNP Paribas	DBK / BNP FP	Banks	ECB 25bp hike Thursday: NIM expansion positive for European banks; watch reaction to post-hike guidance language; rate-sensitive positioning ahead of Thursday	Rate-hike beneficiary; monitor Thursday
Rio Tinto / Glencore	RIO LN / GLEN LN	Metals & Mining	Copper at \$6.64/lb; AI data center buildout = structural copper demand; metals index +3.7% YTD; China demand uncertainty and USD strength temper near-term	Mixed – structural positive, near-term uncertain

13. MACRO / CORPORATE / POLITICAL HIGHLIGHTS

MACRO

1. **US jobs boom reshapes rate narrative.** May NFP +172k vs. 85k consensus; unemployment steady at 4.3%. Fed held at 3.5-3.75% (Apr 29 FOMC), citing elevated energy-driven inflation and Middle East uncertainty. Market now pricing potential Q4 2026 hike. Rate-cut expectations have effectively zeroed out. Bond market: US 10Y at 4.57%, 2-week high. Equity multiple compression risk if yields push toward 4.75%.
2. **ECB set to hike 25bp Thursday (91% priced).** Deposit facility rate to 2.25%. Euro area CPI at 3% (April) driven by Iran war energy spike. ECB leadership maintaining "data-dependent and meeting-by-meeting" language. Post-hike guidance is the key variable: any signal of a pause would be EUR-positive and would relieve pressure on European credit markets. Further hiking signal would accelerate Bund yield rise and tighten financial conditions.
3. **Oil-inflation feedback loop elevated.** Brent at \$94/bbl, WTI at \$91. Iran-Hormuz supply disruption sustains a risk premium. US May CPI (due this week) expected above 3%. Global growth forecasts being trimmed. Energy sector benefits; airlines, transport, consumer-facing businesses under sustained margin pressure. LNG prices globally elevated with Hormuz flow reductions.

CORPORATE

1. **AI semiconductor cycle at a volatile inflection.** Chip stocks dropped 10% Friday (worst day since April 2025) then partially recovered Monday (+6-10% for leaders). Nvidia-SK Hynix memory partnership reinforces structural AI capex. Record 2026 corporate bond issuance partly driven by tech hyperscalers funding AI data centers. AI remains the dominant equity narrative.
2. **Applied Aerospace & Defense (AADX) IPO.** Priced June 2-3 at \$18-21/share; raising ~\$634m. Tests market receptivity for defense-sector listings amid geopolitical tailwind. Performance since listing is an indicator of defense IPO sentiment for the rest of 2026.
3. **European defence acceleration.** Iran conflict and NATO commitments driving European defence budgets. EU defence bond framework (potential €100bn+ mobilisation) in legislative development. Rheinmetall, Safran, BAE Systems, Leonardo in focus. Jefferies has L3Harris as top US defense pick (\$365 PT) with 1.2x TTM book-to-bill and \$36.3bn backlog.

POLITICAL / GEOPOLITICAL

1. **Iran-Israel: ceasefire in the balance.** Weekend exchanges (Iran ballistic missiles, Israeli counter-strikes) marked first direct confrontation since the April ceasefire. Iran suspended operations June 8; Israel halted attacks "for now." Preliminary 60-day MOU reached May 28 awaits Trump approval. Iran's supreme leader Khamenei declared US military bases in the Middle East "no longer safe" on June 2, signalling a hardening stance. Any breakthrough = sharp oil/equity relief rally. Any escalation = oil at \$100+ and equity rout.

2. **Hormuz and Red Sea disruptions continue.** Global trade rerouting away from the Strait of Hormuz sustains freight rate elevation and LNG price pressure. Asia fuel shortages in some markets. Supply chain cost inflation embedded. Shipping names and oil majors benefit; manufacturers and airlines absorb cost.

3. **Trump's Middle East diplomacy.** US President Trump publicly targeting a ceasefire. Fragile diplomatic progress with Iran nuclear talks as part of the framework. Market is pricing a muddle-through scenario; black swan in either direction (permanent peace or full war) remains the dominant macro tail risk for H2 2026.

14. KEY THEMES – TOP 5 BY HORIZON

TODAY'S TOP 5

#	THEME	MARKET STAKES
1	Iran-Israel news flow	Any escalation sends Brent back toward \$98-100 and triggers European equity selling. Any confirmed ceasefire extension = relief rally; oil back below \$90 and risk-on rotation.
2	Chip sector follow-through	Monday's partial recovery (~50% of Friday losses) faces its first real test today. Micron, Marvell, Nvidia need to hold gains to keep the Nasdaq recovery intact. Failure = renewed tech pressure.
3	ECB pre-meeting positioning	Thursday's 25bp hike ~91% priced. Today's positioning: EUR/USD volatility, European bank stocks reaction, and IG credit spread moves in anticipation of the decision.
4	Oil above \$90 and inflation narrative	Sustained high oil keeps CPI elevated, ECB hawkish, and pressure on consumer-facing and transport sectors. Energy sector continues to outperform. Watch oil move at Europe open.
5	DXY at 100 resistance	Dollar index hovering at 100. Breakout above would hurt commodities (gold, copper), EM, and EUR assets. USD strength tied to US rate expectations; any Fed hawkish signal accelerates the move.

THIS WEEK'S TOP 5

#	THEME	MARKET STAKES
1	ECB rate decision (Thu Jun 11)	25bp hike to 2.25% expected. Post-decision guidance language defines EUR, Bunds, and European bank stocks for weeks. Pause signal = relief rally; further hikes signal = sustained yield pressure.
2	Iran-Israel diplomatic calendar	60-day ceasefire MOU awaiting Trump approval. Status unclear after weekend exchanges. Any change in ceasefire status is an immediate market event.
3	US May CPI (expected this week)	Post-jobs data, any upside CPI surprise firmly prices Fed hike. Watch energy component. Downside surprise = bond rally and equity relief.
4	Semiconductor sector stabilisation	Can the chip complex consolidate after -10%/+6% in two sessions? Samsung, Micron, TSMC guidance and AI capex signals will either confirm the bottom or open another leg down.
5	EUR IG bond market window post-ECB	Primary market expected to reopen Friday post-ECB. Size and pricing of first post-hike deals gauges investor appetite and spread direction for summer.

THIS MONTH'S TOP 5

#	THEME	MARKET STAKES
1	ECB rate cycle direction	June 11 hike to 2.25% is the move. Market pricing another 25bp in July. If ECB pauses post-June, EUR rallies and Bunds stabilise. If they signal more, financial conditions tighten materially.
2	Iran nuclear deal / permanent ceasefire	Full ceasefire and nuclear deal = historic oil relief (<\$80), inflation reset, potential path to rate cuts. Continued conflict = \$100+ oil and global stagflation risk through H2 2026.
3	US Fed June 18 FOMC meeting	No cut priced; market debating a hike after 172k jobs. Hike signal compresses equity multiples. Hold with hawkish language = yields hold elevated. Forward guidance will set summer trading range.
4	AI infrastructure capex guidance	Microsoft, Alphabet, Meta, Amazon mid-year capex guidance determines if AI semi cycle extends or pauses. Implications for Nvidia, TSMC, ASML, Micron into H2 earnings.
5	European defence bond framework	EU-issued defence bonds: potential €100bn+ mobilisation; legislative target mid-Q3 2026. If passed, structural re-rating catalyst for Rheinmetall, Safran, BAE, Leonardo, and European credit markets.

15. KEY TRENDS TO WATCH

1 DAY

1. **Iran-Israel news flow:** Any escalation (new strikes, Hormuz threat, ceasefire collapse) triggers immediate oil spike (+\$3-5/bbl) and European equity selling. Monitor Reuters/Bloomberg newswires throughout the session. A confirmed 60-day extension = relief rally.
2. **Chip sector continuation:** Monday's recovery was partial. Nasdaq futures at +0.25% pre-open. If chip stocks (MU, MRVL, NVDA) extend Monday gains through the European afternoon, global risk sentiment stabilises. Failure to hold – watch for renewed tech-led selloff.
3. **EUR/USD 1.15 support:** EUR/USD at 1.1537, hovering at weakest since April. A break below 1.15 = risk aversion signal; above 1.16 = ECB optimism overriding energy concerns. Watch the 1.15 handle carefully.
4. **Oil at \$90+ psychology:** WTI at \$91, Brent at \$94. If either breaks lower on ceasefire news, watch airline, transport, and consumer stocks for relief rally. An oil spike above \$97 again = immediate energy inflation fear and sell-off in cyclicals.

1 WEEK

1. **ECB decision (Thu Jun 11):** Post-hike language is the most important macro event of the week. "Pause after June" language = EUR rally, Bund relief, bank stocks supported. "Further adjustment may be warranted" = sustained pressure on rates and growth assets.
2. **US May CPI (likely Wed/Thu):** Energy component will be elevated given oil prices. A print above 3.5% could trigger fresh Fed hike pricing and another bond selloff. Below 3.0% = relief and potential USD pullback.
3. **EUR IG primary market:** Post-ECB Friday window. Size of pipeline and IPT-to-pricing compression will signal credit investor confidence for the summer. A busy post-ECB week = healthy credit conditions. Thin or wide-pricing deals = deteriorating conditions.
4. **Iran ceasefire extension:** Trump approval of the 60-day MOU is the key binary event. Yes = oil relief, equity recovery, EM bounce. No / further escalation = tail risk scenario.

1 MONTH

1. **Fed June 18 FOMC:** No cut priced; debate now centres on a hike. If the Fed signals a hike, equity multiples face another compression leg. Forward guidance and dot plot update will set trading range for July and August.
2. **Iran nuclear / ceasefire permanency:** Preliminary 60-day MOU awaits Trump approval. A permanent peace deal = transformative for energy markets, inflation, and the global rates path. Its failure = sustained \$90-100 oil and global stagflation risk materialising.

3. **AI capex cycle durability:** Hyperscaler H2 2026 capex guidance at mid-June results/conferences determines if AI infrastructure investment sustains current pace. ASML, TSMC, Nvidia all facing the question of whether AI demand growth can sustain record chip prices.

4. **EU defence bond legislation:** Mid-Q3 target for the EU defence bond framework. Potential €100bn+ mobilisation. Outcome will reshape the European credit market, defence sector valuations, and EU fiscal architecture for years.

5. **Inflation path from June CPI data:** Euro area and US CPI data in coming weeks. If energy prices moderate (ceasefire) and oil drops below \$85, September rate cut talk could return. If inflation stays at 3%+, the stagflation narrative consolidates and both ECB and Fed remain stuck in restrictive territory through Q3 2026.
