| iTraxx Main                  | n/a   | n/a  | n/a       |
| iTraxx Crossover             | n/a   | n/a  | n/a       |

### COMMENTARY

Primary tone is hard to verify. The backdrop is unfavourable for execution: sovereign strain led by France, oil above \$100 and a 5%+ US 10Y yield point to wider concessions and selective windows, with defensive financials and SSA most likely to find demand. Industrials, transport and energy issuers face higher funding costs. This is inference, not sourced deal data.
